PERSONAL STATEMENT

I'm a 36 years young Architect from Bangalore, India. I love everything that has to do with design & development and I feel a true devotion for 3d modeling.

I am designer, architect and photographer. My works aims to highlight the convergence of technology, architecture and photography.

I have almost 10 years of experience working as a Architect. I have done my Masters of Arts in Architecture at Stadelshule Architecture Class (SAC), Frankfurt.

Graduated from the School of Design, Siddaganga Institute of Technology, India. Also have done junior and senior in Art before studying architecture.

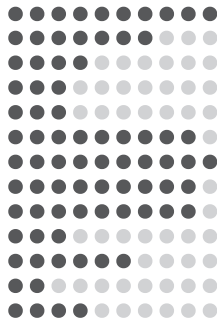

Currently building my own design office called Alae Architects.

Prior to B.Arch I worked with a number of upcoming Architects in India including Cadence and InForm Architects where I was able to develop and culminate my design skills.
